Address

Thionville, 57100 France

About Me

Curious by nature and eager to learn, I enjoy working at the intersection of technology, data, and business needs. My experience has allowed me to contribute to data engineering, analytics, reporting, and dashboard development projects, giving me a broad understanding of how data creates value within an organisation. I particularly enjoy diverse environments where I can tackle different types of challenges and continuously expand my skill set.

Technical Skills

- Microsoft Fabric
- Power BI
- SQL
- Python
- DAX

Data & Analytics

- Data Modelling
- KPI Definition & Design
- Dashboard Development
- Business Intelligence
- ETL / ELT Processes
- Data Visualization

Soft Skills

- Analytical Thinking
- Problem Solving
- Collaboration
- Adaptability
- Technical Documentation

Languages

- French (Native)
- English (Professional proficiency - B2/C1)
- Dutch (A1/A2)

Experience

Data Engineer Intern

April 2026 - July 2026

BCE, Luxembourg, Luxembourg

As a Data Engineer Intern, I contributed to the design and implementation of enterprise reporting and analytics solutions using Microsoft Fabric, Power BI, and Azure. Working across data engineering, analytics, and governance activities, I participated in KPI definition, data modelling, source integration, dashboard development, report migration, technical documentation, and data readiness assessment, mapping business KPIs to their source systems to identify data gaps ahead of integration. I also helped improve operational reporting by building analytical dashboards, supporting stakeholders in transforming business requirements into reliable and actionable data products.

Data & AI Intern

July 2025 - August 2025

BCE, Luxembourg, Luxembourg

As a Data & AI Intern, I contributed to the development of data-driven solutions by creating Python plugins for NetBox and supporting data analysis and visualization activities. I worked with CSV and Excel data imports to facilitate data integration and helped automate recurring operational tasks, including monthly scanning processes and the generation of detailed reports, improving efficiency and data visibility.

Regional Teaching Assistant

February 2025 - July 2025

EPITECH, Nancy, France

As a Regional Teaching Assistant, I mentored students in the development of their technical projects, providing guidance on both implementation and documentation. I also participated in the assessment process by reviewing project deliverables and evaluating oral presentations, helping ensure clear communication and adherence to academic standards.

IT Service Management Intern

July 2024 - December 2024

BCE, Luxembourg, Luxembourg

During this internship, I supported the development of data and reporting solutions by working with SQL databases, Python-based ETL processes, and web application reporting. I also contributed to the automation of audit reporting workflows, helping improve data accessibility, reporting efficiency, and process reliability.

Education

HoGent - Applied Information Technology

September 2026 - June 2027

Gand, Belgique - Exchange Semester

During my exchange semester at HOGENT University of Applied Sciences and Arts, I expanded my knowledge of applied information technology through an international, English-taught curriculum. The programme combined software engineering, data science, artificial intelligence, business alignment, and cross-cultural collaboration, while strengthening my ability to work in multicultural environments and adapt to different approaches to problem-solving and project delivery.

EPITECH - Programme Grande Ecole

October 2023 - July 2028

Nancy, France

Throughout my studies, I built a solid foundation in programming and software engineering through a combination of individual and collaborative projects. Working on real-world assignments helped me develop autonomy, adaptability, and analytical thinking, while strengthening my ability to learn new technologies and work effectively within a team.
